

FOR CREATORS — READ BEFORE FILMING

CREATOR BRIEF

⚠️ NON-NEGOTIABLE

Read this whole document before filming. If a video breaks any rule in here, we can't run it — and can't pay for it. A 10-second question to us always beats a rejected ad.

WHAT PICK1 IS — SAY IT THIS WAY

Pick1 is an **AI sports analytics app**. It publishes **predictions** with a **confidence score** on every game, across 9 sports, and grades its entire track record on a **public ledger** — **wins AND losses**.

WHAT PICK1 IS NOT — NEVER BLUR THIS

It is **not a sportsbook**. It doesn't take, place, or facilitate wagers of any kind. You're advertising an analytics app — the way you'd advertise a stock-research app. **Not a way to make money.**

★ THE GOLDEN RULE

NEVER TALK ABOUT MONEY YOU — OR ANYONE — **WON.**

All results language belongs to the app's public record, never to a person:

✓ "The model hit 72% last month — the ledger's public."

✗ "I made \$500 last weekend." / "This paid for my vacation."

One personal-winnings claim is enough for Meta to reject the ad and flag the account. This is the **#1 reason sports apps get banned** from advertising.

STRICT

BANNED WORDS – NEVER ON CAMERA, NEVER IN CAPTIONS

01 – GAMBLING VOCABULARY

ANY of these re-classifies the ad as gambling

- bet / betting
- wager
- gamble
- sportsbook
- bookie
- betslip
- parlay
- odds
- the line
- spread
- moneyline
- over-under
- cover
- units
- bankroll
- juice
- vig
- chalk
- fade
- tail
- sweat
- action
- stake
- capper
- handicapper
- degen
- "plays"
- "pool" (money)

02 – MONEY-PROMISE VOCABULARY

Reads as an income claim – instant rejection territory

- guaranteed
- lock
- sure thing
- can't lose
- free money
- easy money
- get rich
- profit
- ROI
- winnings
- payout
- cash out
- "pay your rent"
- "quit your job"
- any \$ amount tied to a result

03 – CLICKBAIT VOCABULARY

Trips Meta's sensational-content filter

- "they don't want you to know"
- secret
- loophole
- hack
- "before it gets banned"
- illegal

SAY THIS INSTEAD

bet / wager / play	→	pick / prediction / call
odds / the line	→	confidence score / the model's number
it won me money	→	the model got it right / it called it
covered the spread	→	called it / had it before tip-off
lock / guaranteed	→	high-confidence pick (81%)
tail the picks	→	check the predictions
sportsbook	→	don't reference sportsbooks at all

STRICT

BANNED VISUALS — NEVER ON SCREEN

- ☐ Cash, money counting, bank / Venmo / PayPal screenshots, "earnings" numbers
- ☐ Betslips, or ANY sportsbook / casino app, logo, or ad (DraftKings, FanDuel, etc.)
- ☐ The app's **POTENTIAL PAYOUT / POTENTIAL RETURN** screens — only use the 7 approved clips we send you (the Footage Kit). **Do not screen-record the app yourself.**
- ☐ Anyone who is — or looks — under 21
- ☐ Real tipsters' / competitors' names, handles, or logos

CHECKLIST

REQUIRED IN EVERY VIDEO

- ☒ Only the approved **Footage Kit** clips behind you (green screen) or as the screen recording (faceless)
- ☒ If you mention accuracy ("72%", "it called it"), a **LOST badge must appear on screen** in the same video — the public-losses angle is the whole brand
- ☒ Frame it as **analytics**: "predictions," "confidence score," "public ledger"
- ☒ **Paid partnership label ON** + #ad in the caption
- ☒ End card: **"Pick1 — first week free"** (we provide it)
- ☒ Nothing goes live until **Ethan approves the final cut**

MAKE IT SOUND LIKE YOU

The scripts are **beat sheets, not lines to recite**. Rewrite the wording in your own voice — your slang, your pacing, your humor. Keep three things exactly as written: **(1)** the hook idea, **(2)** which app screen shows at each beat, **(3)** every rule in this doc. Scripted-sounding UGC dies in the feed. If you change a line, run the new wording past the banned-words list before filming.

NUMBERS MUST MATCH THE APP

Before filming, check the live ledger in the kit footage and say **the number it currently shows** — don't recite "72%" from this brief if the app says something else that week. Every stat you say must be visible on screen behind you. If in doubt, say less: **"the whole record is public"** is always safe and always true.

CONVERSION

THE FIRST 1.5 SECONDS DECIDE EVERYTHING

- 01 Open **mid-thought, already talking** — no "hey guys," no intro, no logo
- 02 The hook must create a question the viewer **needs** answered ("it posts its losses... *on purpose?*")
- 03 **Don't say the app name in the first 5 seconds** — name it only at the CTA, or they scroll before the payoff
- 04 Show the most surprising screen — **the ledger with a LOST badge** — within the first 3 seconds
- 05 **One idea per video.** If a sentence doesn't push toward the CTA, cut it
- 06 Talk **10% faster** than feels natural; cut every breath and pause in the edit
- 07 **Captions burned in, word-by-word** — most viewers watch muted
- 08 End on the CTA, **hard cut, no outro**: "First week's free — link below."

 DELIVER EACH SCRIPT 3 WAYS

Film your assigned script once, then **re-film just the first 3 seconds** with two alternate hooks from the bank on the next page. Three hooks × one body = **three ads for Meta to test**. This is how we find the winner — and how you end up with a top-performing ad in your portfolio.

SPECS

DELIVERABLES

-  **9:16 vertical, 1080×1920**, under 30 seconds (sweet spot 15–22s)
-  **Face version** (green screen over kit clips, point at the UI) and/or **faceless version** (kit clips full-screen + your VO + captions)
-  **3 hook variants** per script
-  Export: clean version (**no TikTok / CapCut watermarks**) + your raw takes
-  The caption we provide goes under the post **unedited** (it includes the required disclaimer)
-  Accept the **Meta partnership-ads request** so we can run it from the Pick1 account

 EXACT-SCORE CALLS — SPECIAL RULES

The app sometimes calls the **exact final score**, and the graded green "EXACT SCORE HIT" card is fair game — it's real, timestamped, and graded in-app. But:

-  Only a **real** exact-score hit from the Footage Kit (Clip H) — never a mockup or hypothetical
-  Say **"it called this one exactly"** — never "it predicts exact scores" as a general ability. Exact hits are rare; presenting them as routine is exactly the claim Meta bans
-  Every exact-score video includes the honesty beat: **"this is rare — most picks it just calls the winner, and the misses are graded publicly too"** with the ledger on screen
-  Never attach money to it ("imagine if you'd played that..." = instant rejection)

SWIPE FILE

HOOK BANK — PICK ANY, OR PITCH YOUR OWN

Your own hook is welcome — it just has to pass the banned-words list first.

HOOK 01

"This sports app posts every time it's wrong. On purpose."

HOOK 02

"My group chat is convinced I sold my soul."

HOOK 03

"The market said one thing. The AI said something very different."

HOOK 04

"I used to pay \$200 a month to a guy on Telegram who deleted his losses."

HOOK 05

"I watch games like I've already seen the ending."

HOOK 06

"I don't have opinions about sports anymore. I have probabilities."

HOOK 07

"An AI watched 1.2 million games so I don't have to."

HOOK 08

"HR banned me from the office bracket challenge."

HOOK 09

"I tracked this app for 30 days to prove it was a scam."

HOOK 10

"My girlfriend doesn't watch sports. She's beaten me 11 weekends straight."

HOOK 11

"Every picks page deletes its misses. This one architecturally can't."

HOOK 12

"I stopped watching pregame shows. I check one number instead."

HOOK 13

"My least sports-literate friend keeps calling every upset. I found out why."

HOOK 14

"This app told me who'd win before tip-off. Then it graded itself in public."

HOOK 15

"Watching sports with this app is like having subtitles for the score."

HOOK 16

"It's not magic. It missed 28% of its picks last month — and left every miss up."

HOOK 17

"My friend Marcus hasn't spoken to me since halftime."

HOOK 18

"You have a gut feeling. It has 1.2 million games of training data."

HOOK 19

"Dave in accounting filed a complaint about me."

HOOK 20

"I called the comeback at halftime and got asked to switch seats."

HOOK 21 • EXACT-SCORE RULES APPLY

"It didn't just call the winner. It called the exact final score."

HOOK 22 • EXACT-SCORE RULES APPLY

"AI predicted score: 2-1. Final score: 2-1. I need to sit down."

QUESTIONS?

Nothing is a dumb question — a 10-second check with us beats a rejected ad. Send your final cut for approval before posting anything.
